Current-State Waste & Root-cause Analysis (Lean Diagnosis)

Current-State Observation	Waste Type	Impact	Root-Cause Hypothesis
Customer waits in queue	Waiting	↑ Lead Time	Demand handled sequentially
Agent searches multiple systems	Overprocessing	↑ Processing effort	Information fragmented
Customer repeats information	Rework	↑ Rework	Information not automatically carried forward
Status requires agent follow-up	Waiting	↑ Cycle time	No real-time status visibility
Multiple handoffs	Waiting	↑ Lead time	Process ownership fragmented

Top 3 Waste Drivers

Waiting
minute lead time

64 minutes of the 92-

Manual system searching
status search

Concentrated around verification and

Rework/
Follow-up
of visibility

Caused by incomplete information and lack
