Improvement Backlog

Translating Lean findings and the future-state design into executable improvement work

Outcome: reduce waiting, searching and rework

ID	Improvement	Type	Priority	Expected Outcome
IMP-01	Create unified status view	Feature	**High**	Self-service status visibility
IMP-02	Integrate status data sources	Feature	**High**	Single source of truth
IMP-03	Automate customer verification	Improvement	**High**	Reduce repetition and rework
IMP-04	Define handoff and ownership rules	Process	**Medium**	Reduce delays and handoffs
IMP-05	Enable proactive status notifications	Feature	**Medium**	Reduce customer follow-up
IMP-06	Standardize request intake	Process	**Medium**	Reduce incomplete information

Next step → Convert the prioritized improvements into Jira work items for Agile execution.
