Current-State Value Stream Map (VSM)

Purpose: To visualize the end-to-end process, information flow, delays and waste in the current state.

Scenario: Customer requests an update on an existing service/request

TOTAL PROCESSING TIME – 28 min

TOTAL WAITING TIME – 64 min

TOTAL LEAD TIME – 92 min

% VALUE ADDED PROCESSING TIME – 25%

KEY INSIGHT: (70%) of the total lead time is waiting time. The major delays arise from queues, manual searching, handoffs, and rework across the current process.
Customers depend on the support process to access status information.
